- Researching/sourcing plugins (Flash/jQuery/Ajax/CSS/HTML) for prototyping UI mockup's Specifications where needed.

[Experience To Date](#)

Date: [May 1 – May 4 2012](#)

Front End Developer Contract Role

Company: [Billington Cartmell](#)

Company Expertise: An Independent Integrated Marketing Communications Agency.

Role: Front End Developer

Responsibilities and Duties: I was urgently brought on board to assist in coding content a [ScottyBrand](#) campaign competition based around [Disney Pixar's 'Brave'](#). I assisted the team in setting up half a dozen WordPress Template Pages based on the 'Brave' theme aesthetic.

Skills Applied: My work at BCL primarily focused upon translating PSD assets into HTML & CSS. I used typical image replacement methods for rounded corners and button to achieve maximum browser compatibility (IE7/8), whilst coding content structure for older browser support was made seamless by ensuring a natural flow of all HTML elements using Float and Clear methods. I also assisted in implementation of ['Lightbox_me.js'](#) as well as the [ColorBox](#) jQuery library for pages that required image sliders and light-box functionality.

Date: April 2 – April 24 2012 **Front End Developer Contract Role**

Company: [Bureau for Visual Affairs](#)

Company Expertise: Bureau for Visual Affairs develops communication tools for businesses.

Role: Front End Developer

Responsibilities and Duties: To mark up a User Interface in HTML5 and CSS3 from PSD assets. The Project had been commissioned by [The British Museum](#), and intended to be used as tool for curating exhibit items in a modern intuitive way. The project required the User Interface be to developed as a fluid layout, for a seamless accessible user experience and emphasis coding for modern CSS rendering engines (primarily FF/chrome).

Skills Applied: Hand coding in Notepad++, using browser testing/development tools such as Firebug/Chrome Developer tool for fluid layout scaling. jQuery was sourced specifically for toggling hidden configuration panel's and for bespoke combo-box styling across IE and FF. Additionally CSS3 styles were sourced to add iphone-centric toggle/button sliders effects.

Date: March 12 – March 26 2012 **Front End Developer Contract Role** **Company:** [Neutral](#)

Company Expertise: Neutral specializes in integrated communication design and technology solutions.

Role: Front End Developer

Responsibilities and Duties: I was urgently brought into this short term contract to assist in bringing to life a prototype interface designed for a tablet centric embedded entertainment system. The finished prototype was to go on display at the [Aircraft Interiors Expo](#) in Hamburg, Germany. Implementation of the interface focused on using HTML5 standards and fluid layouts. During this project i explored the jQuery mobile frame work for the interface functionality, as well as CSS3 solutions to improve fluid layouts and page load times.

Skills Applied: Using in Notepad++ in Hand coding HTML/HTML5 techniques and pushing for CSS3 standards when support was available. Reffering to PSD' slices designs for initial layout/element sizes. Sourcing jQuery components for carousel functionality. Testing fluid layouts on a range of mobile and tablet devices.

Date: July-August 2010

Company: www.DigitalSnowball.com

Company Expertise: London-based media production company specializing in web video, corporate video, video production and web design.

Role: Assistant Web Developer on a Joomla based Real Estate Project.

Responsibilities: Focusing on the *Joomla* (1.5) CMS, our client requested a Property Sales and Letting website. Coming on board late in the project, my involvement required me to supplement a suitable free component that would deliver on the clients initial request. Selecting The [Com Property](#) component required my expertise in installing and configuring it to a specification that reflected the site's template design. Additionally my short involvement in this project consisted of setting up two different implementations of [Breezing Forms plugin](#), for different types feedback sections on the site.

Skills Applied: XHTML/CSS, SEO Friendly techniques, configuring Server-side/Client-side scripting.

Skills learned: Understanding the importance of working with the right template from the get-go, and learning how to quickly adapt additional plugins or components to fit its formatting. Insight into CSS and HTML fixes for sourced module/component/plugin's, such as contact form styling. Gained an understanding of the potential value in exporting saved customer response data accumulated from the Breezing Forms plugin into a CSV file for use in external database's or statistical means.

Date: Dec 2009 – Oct 2010: Freelance Experience

- [1.http://www.insightsurfer.net/aband.php](http://www.insightsurfer.net/aband.php) Flash Music Player/jQuery UI plugins and Contact form
- [2.http://www.insightsurfer.net/amodelingportfolio.php](http://www.insightsurfer.net/amodelingportfolio.php) Flash slide show with jQuery menu
- [3.http://www.insightsurfer.net/flash](http://www.insightsurfer.net/flash) An Actionscript3 version of my portfolio
- [4.http://www.insightsurfer.net/oldportfolio](http://www.insightsurfer.net/oldportfolio) CSS/HTML Flash Time Lapse Video/jQuery Content Slider/Ajax Contact Form/iFrames

Skills Learned and Applied: My progression from just plain CSS and *HTML* to server and *client-side scripting* has enabled me to take on ever more challenging projects. I recently began theming A *Wordpress CMS* from scratch. This has given me a macro perspective into Content Management rather than the design and minor-implementation background I have been used to. The links below entail projects I undertook since starting my masters degree. Work on my part included front end design in *Photoshop* first, with implementation of *static/dynamic features* following, further free lancing projects.
